

## DM355 WINDOWS CE BINARY BSP SOFTWARE LICENSE AGREEMENT

### Please Read:

MPC Data Limited (MPC Data) provides a sample evaluation Windows CE Binary BSP image for Licensee to evaluate the Windows CE operating system on TI's TMS320DM355 Digital Video Evaluation Module TMDXEVM355.

1. The Binary BSP is licensed for evaluation purposes only, and not intended for commercial use.
2. The Binary BSP or any derivative may not be deployed in commercial products without prior agreement from MPC Data
3. No warranty is offered on the Binary BSP
4. Licensee shall not reproduce, sell, distribute or sublicense the use of copies of the Binary BSP
5. The Binary BSP shall remain the property of MPC Data

This license agreement must be completed, and a signed original copy mailed to MPC Data at:

County Gate,  
County Way,  
Trowbridge,  
Wiltshire,  
BA14 7FJ

or faxed to MPC Data at +44 1225 710601

### Windows CE BSP Functionality and Purpose:

MPC Data's Windows CE binary BSP includes peripheral drivers, the OAL (OEM Adaptation Layer), and a build environment to build and deploy a Windows CE operating system on a TMDXEVM355 hardware platform.

If the sample Binary BSP does not meet Licensee's requirements (e.g., memory size, display, OS components, driver additions) on Licensee's own custom hardware it may be required to create a custom Windows CE image based on specific product requirements.

For more information on purchasing or licensing the Windows CE BSP in source code format for a custom board solution, or for Windows CE software development services please contact MPC Data at [windows@mpc-data.co.uk](mailto:windows@mpc-data.co.uk).
